Summary

Specializing in end-to-end development of user-centric products, I oversee the complete lifecycle from conceptualization and feature roadmap planning to **high-fidelity UI design** and **scalable systems architecture**. My portfolio includes the delivery of enterprise-grade solutions, such as a curated platform for design resources and a sophisticated resource allocation tool, emphasizing automation and iterative product enhancement.

Projects

Casp | Next.js, tanstack, Typescript, Go, Electric SQL, Redis

[Github](#)

- Developed a comprehensive workforce allocation platform designed to optimize the management of personnel, projects, and resource distributions through real-time synchronization and no-code customization.
- Engineered a schema-driven onboarding system that facilitates dynamic field configuration tailored to specific organizational requirements without manual code intervention.
- Implemented **high-performance table synchronization** utilizing Electric SQL and TanStack DB to ensure data consistency.
- Designed a polyglot system that features a Typescript front end integrated with a **Go microservice** for robust Excel data processing.
- Designed an enterprise-grade backend that incorporates sophisticated row-level security protocols and privilege escalation patterns to maintain stringent data integrity.

Design Index | Astro, Typescript, Redis

[Website](#) | [Github](#)

- Curated a premium collection of design resources, rigorously vetted for quality, which currently attracts **1,000 monthly views** and maintains a **domain rating of 11**.
- Engineered an **efficient full-text search system** utilizing Supabase and Wink-NLP for advanced semantic matching.
- Developed a **scalable image storage solution** with Cloudflare R2 object storage to ensure rapid content delivery.
- Optimized search engine visibility and performance by implementing server-side rendering with React Router.

Tech stack

Languages - JavaScript, TypeScript, Python, Go, Java, C
Frontend - ReactJS, Next.js, Astro, Tailwind CSS, HTML5, CSS3
State and Data - Zustand, Tanstack (Query), Tanstack (DB), ElectricSQL
Backend and DB - PostgreSQL, MySQL, Redis, REST APIs
Tools and Design - Figma, Paper

Achievements

Published an article of a tech product on medium that got 4000 views and 500 reads

Education

Manipal Institute of Technology
Bachelor of Technology in Computer Science and Engineering
CGPA: 8.3/10

Bengaluru, India
Aug 2024 - Present
